The Natural Progression

Replaces Blown Straw | Uniform Coverage | Wood Mulch Replacement
Saves Money & Time | Faster Loading & Application Times
Get More Per Tank Load | Load More – Spray More

HYDROSTRAW

PRODUCT FORMULATIONS

(V.E.M.) Vegetation Establishment Mulches

The Natural Progression

Straw is the number one used fiber for erosion control and vegetation establishment, now it's conveniently available to you in a hydraulic applied form. **Hydro-Straw® Mulch** is an innovative new mulch product made right here in the USA. Our specially formulated composition of annually renewable natural fibers, tackifier, and other additives provides a new alternative to the old conventional wood mulch, paper mulch, and cellulose mulches of the past. You'll now experience more uniform coverage, quicker and much easier loading procedures, and a product that requires less water to apply making you more efficient.

HYDRO STRAW ORIGINAL

- Replaces Blown Straw
- Ideal for In-Field Mixing Binders
- Faster Loading & Application
- Replaces Paper & Wood Based Mulches
- Load More Spray More – Use Less Water

HYDRO STRAW GUAR PLUS

- Extra Strength for Difficult Slopes & Soil Conditions
